QUALITY CERTIFICATES

ISO 9001 Certification – Saudi Arabia

In today's modern time it has become a basic requirement for all organizations to pay extra attention to quality in order to co-exist and sustain in their respective markets. When it comes to quality, the best way to getting you internationally accepted is by acquiring an ISO 9001 quality management system. ISO 9001 is an internationally recognized standard for quality management within an organization.

In Saudi Arabia as well, both small businesses and global enterprises with ISO 9001 certification are in high demand and people prefer using their products or services over others. The ISO 9001 quality certificate benefits a company.

ISO 9001 Quality Management System Helps a Business Grow

ISO Arabia standard provides meaningful benefits to a business and helps it improve, monitor, and ensure high quality in all areas of its operations. By achieving the standard you not just establish a set of procedures, but also acquire a perfectly suitable workable **Management System** within your organizations.

GREEN SOUL

en_We translate the respect for nature and environment that surrounds us, in concrete actions beginning from the product design that individualizes, in respect to our aesthetic mood -, the solutions with less impact on the environment, privileging the use of natural materials, recyclable and originating from controlled and certified areas, but not only; we also ask to creative team, intelligent and efficient ideas for durable products that can guarantee a long lasting life cycle and compact and light packaging to limit transport impact. We invest in resources so that all our supply chain can be rewarding and attentive of these values.

It is possible, upon customer's request, that the wood conglomerate used for panel production falls into the **CARB P2** class to meet **ANSI / BIFMA** emission standards as established by the **LEED** Certification with **IEQ4.5** credit. Martex has certified its quality process in accordance with the **UNI EN ISO 9001** standard.

The Design Concept of **pigreco** worked on aesthetics but also on easy assembling and quick installation process that result particularly easy and intuitive.

4 x 

The cable management can be effected when the workstation is completely assembled. Cable rise can be made through side legs or through optional central tower upholstered in technical fabric. We highlight the maximum span of 3600 mm between the side legs and the possibility for the legs to be painted in two base colour finish, white and titanio or in optional 6 lacquered colours.

sound absorption

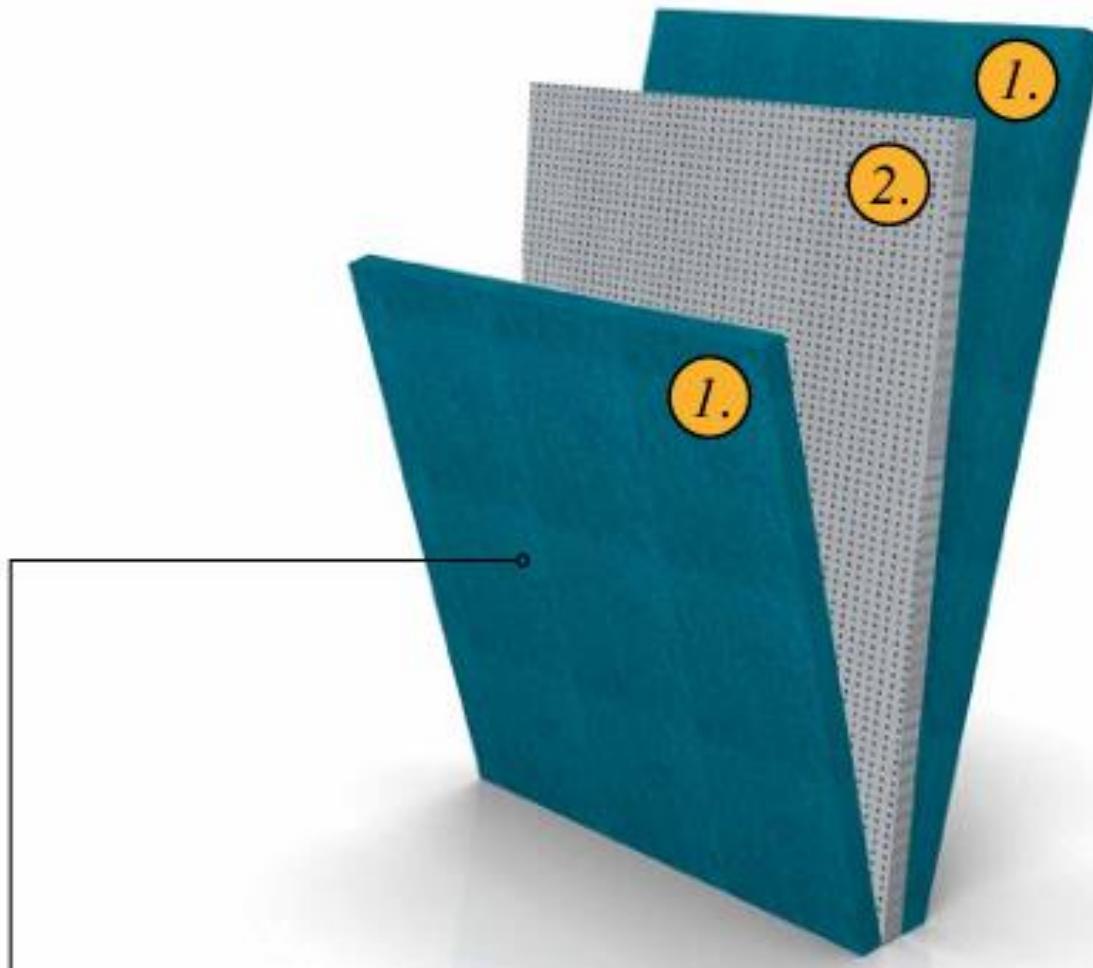

1. *Fabric cat. C, D, F: fabric improves soundproof performance of the internal panel.*

2. *Acoustic Panel composed by melamine board 18 mm th. with specific linear perforation, designed to create a balanced environmental acoustic.*

The fabric upholstery (Cat. C-D-F) personalizes the product and improves its sound-proof performance.

*** Available for projects only**

**95% less noise
20% more productivity**

1. *Tessuto cat. C-D-F: il tessuto aumenta le prestazioni del pannello fonoassorbente interno. 2. Pannello realizzato in MDF spessore 18 mm e dotato di specifica perforazione differenziata studiata per creare un'acustica ambientale equilibrata. Il rivestimento in tessuto (Cat. C-D-F) personalizza il prodotto e ne incrementa il potere fonoassorbente.*

*** Disponibile solo per progetti**

1. *Tissu cat. C, D, F: le revêtement en tissu augmente le pouvoir phono-absorbant du panneau intérieur. 2. Panneau réalisé avec MDF 18 mm d'épaisseur et équipé de spécifique forage différencié, conçue pour créer une acoustique environnemental équilibré. Le revêtement en tissu (Cat. C-D-F) personnalise le produit et augmente le pouvoir phono absorbant.*

*** Disponible seulement pour les projets**

en_The concept of "Piazza" inspired the design of operative environments similar to small neighborhoods where people work as in small communities, separated but interlinked one to another in an optimal space to foster collaboration and enhance creativity at work.

it_ Il concetto di "Piazza" ha ispirato la progettazione di ambienti operativi simili a piccoli quartieri in cui le persone lavorano come in piccole comunità, separate ma collegate tra loro in uno spazio ottimale per favorire la collaborazione e migliorare la creatività sul lavoro.

fr_ Le concept de "Piazza" a inspiré la conception d'environnements de travail similaires à de petits quartiers où les gens travaillent comme dans de petites communautés, séparés mais liés les uns aux autres, un espace optimal pour favoriser la collaboration et améliorer la créativité au travail.
